Description

JET COMPACT PORTABLE SUCTION UNIT

Extremely compact suction device to be used to remove fluids from the airway or respiratory support system.

The device creates a negative pressure that draws fluids through disposable tubing that is connected to the collection container.

Easy view of the setted vacuum thanks to the LED indicators.

Classification ISO: high vacuum / high flow.

Supplied with 12 V power cable, battery, disposable container with filter, disposable patient tube, manual GB, IT.

Made in Italy.
