Description

Stainless steel emergency trolley - small
Trolley size (cm): 67x64xh 100-160
Number of drawers: 5
Drawers material: stainless steel

Professional, solid and sturdy emergency trolleys with components in plastic material (technopolymer) or stainlesssteel sheet painted with epoxy powders to obtain maximum lightness, maneuverability and ease of use.
Self-supporting and monocoque structure.
Upper part has large support surface in technopolymer plastic material to facilitate cleaning and disinfection.
Ergonomic push handle firmly attached on the right side of the trolley.
Front part designed for insertion of modular drawers: silent sliding of the drawers on guides with ball bearings, equipped with limit stops and designed for central locking with seal.
Defibrillator plate has a plexiglass plate and tubular support in stainless steel, 360° rotatable and lockable every 10°, device can be locked by means of straps that can be adapted to any size.
Stainless steel IV stand adjustable in height with locking device.
Heart massage plate made of transparent plexiglass.
Five standard drawers entirely made of AISI 304 stainless steel.
Additional extractable worktop in technopolymer plastic material on the left side; built-in compartment complete with four shelves with front panel all made of technopolymer plastic material.
4 castors Ø 125 mm, anti-thread, pivoting of which 2 antistatic and 2 with locking system with lever, wheel and fork on ball bearings.
