- Gauge mm: 1.3x45
- Colour: Green
- Minimum order: box of 50

Latex, PVC, DEHP free
Multi-Access Septum is designed to control the flow of blood from the catheter hub during needle withdrawal and while exchanging subsequent Luer connections.
Automatic safety device to protect clinicians.
Unique geometry of the Universal Back Cut Bevel aids in accessing difficult veins by providing a highly flexible pathway for easy catheter insertion with less tearing.
Integrated Stabilization Platform is designed to minimize catheter movement to help reduce catheter-related complications.
Double Flashback technology helps to support first stick success through quick visual confirmation that both - needle and catheter - are successfully in the vein.
