EAN/UPC	0014646048883
PARAF	923363636
GMDN	65445

Description

INFANTSCOOP curettes: For the smallest ears. For when a small scoop works better. Can be used through an otoscope. Flexible 2 mm wide tip.

Our four styles of curettes give you the most effective, economical and safe way to remove cerumen - whatever the size of ear or consistency of cerumen.

• Patient comfort: metal curettes are cold, hard and sharp. BIonIx ear curettes with rounded plastic tips reduce trauma and risk of laceration. Latex free.
• Effectiveness: ear curettes can duplicate the effectiveness of metal curettes in almost any situation and their polypropylene composition makes them virtually unbreakable.
• Disposability: ear curettes don’t require expensive and time-consuming sterilization and eliminate the risk of cross-contamination.
