Description

AMBU® WhiteSensor
WhiteSensor electrodes combine versatility with quality and functionality.
The wide range of sizes, shapes, gel types and backing materials makes it easy to choose the optimal device for every situation.
Carefully selected features to match each individual situation, covering all patient needs in monitoring.
Flexible and reliable materials and adhesives, able to follow skin movements without lifting off, allow both patient comfort and signal quality.

Ambu® WhiteSensor 4540
Highly conductive wet gel system which guarantees a fast and accurate trace during 12-lead ECG procedures.
Thanks to the strong high-tack adhesive foam, time wasted due to electrode drop-off will be reduced.
The radiolucent 4 mm slot connector allows the patient to undergo X-ray and scanner procedures.
5 pieces per card.
