Performance level

EN388:2016	0	1	2	3	4	5
a. Abrasion resistance (cycles)	< 100	100	500	2000	8000	-
b. Cut resistance (Coup test)	< 1.2	1.2	2.5	5.0	10.0	20.0
c. Tear resistance (newton)	< 10	10	25	50	75	-
d. Puncture resistance (newton)	< 20	20	60	100	150	-

EN ISO 13997 (TDM-100 test)	A	B	C	D	E	F
e. Straight blade cut resistance (TDM 100 test)	2	5	10	15	22	30

a. Abrasion resistance: based on the number of cycles required to rub through the sample glove.

b. Cut resistance: based on the number of cycles required to cut through the sample at a constant speed with a rotating blade.

c. Tear resistance: based on the amount of force required to tear the sample.

d. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point.

e. Cut resistance according TDM100 test based on the number of cycles required to cut through the sample at a constant speed with a sliding blade.

Water repellent
Keeps your hands dry by repelling water and moisture.

Double layer coating
These gloves have two layers of coating: the first layer offers superior protection, while the second provides excellent grip, even in wet or humid conditions.

High dexterity
These gloves are made from the thinnest knit material available, ensuring the highest level of dexterity, comfort and protection.

Extraordinary grip
You'll have a firm hold on objects whether they are dry, wet, or oily, thanks to the exceptional grip these gloves provide.
