Description

CRYOMEGA® VET DUAL DELIVERY CRYOSURGERY KIT

CryOmega® Vet Dual Delivery is the perfect choice for cryosurgery treatment of benign lesions.
Cryogen reaches a temperature of -68 C° and is immediately ready to use.
It can be delivered by cones or buds.
It combines the portability of a canister with the effectiveness found in more expensive liquid nitrogen-based units.
Single handed design, easy to use, no sutures required.

Multilingual manual: GB, FR, IT, ES, DE.
Available GR, RO, NL, BG, SE, PL, PT from www.gimaitaly.com

• Effective freezing
• Anesthesia not required
• High efficacy

• Dual delivery: buds or cones
- Cones: Different sizes to provide precise treatment
- Buds: Appropriate when treating hard to reach or thin-skin surfaces
