**Memory foam**
The removable memory foam insole provides extra comfort during stepping and can be exchanged with your own orthopedic sole.

**Oxygrip / SJ Grip**
Rubber outsoles with Oxytraction® technology provide excellent traction on both dry and wet floors and meet SRC (SRA+ SRB) standards.

**Electrostatic Discharge (ESD)**
ESD provides the controlled discharge of electrostatic energy that can damage electronic components and avoids risks of ignition resulting from electrostatic charges. Volume resistance between 100 KiloOhm and 100 MegaOhm.

**Coolmax® lining**
Coolmax® technology was originally developed for athletes. The material transports moisture and sweat, so that the body stays dry. We found it extremely suitable for people who work hard for hours every day too.

**Removable insole**
Renew your insole at a regular base or use your own orthopedic insoles for a higher comfort.
