Description

3M™ SINGLE-PATIENT STETHOSCOPES - length 72.4 cm

• 3M code: SPS-YP1100
• Paediatric - head Ø 36.2 mm
• Box of 100

3M™ has developed a new stethoscope, which combines advanced acoustic engineering and infection prevention.
It is intended for single-patient use, adult or child in an isolation area, and to be disposed when no longer needed.
It helps to reduce potential risks of patient-to-patient crosscontamination, that could occur using reusable stethoscope.

Features:
- high-quality acoustics with clear and reliable sound
- soft and flexible earplugs isolate from noises
- pressure sensitive diaphragm allows to hear high and low frequency sounds
- comfortable flexible headset and angled ear tubes provide an excellent seal
- flexible tubing, to easily move and position chestpiece
- easy-grip moulded chestpiece for multiple hand positions
